OUR MISSION

To contribute to nation-building by supplying durable, lab-tested concrete products that form the foundation of safe homes, roads and infrastructure across Uganda.

WELCOME

Welcome to Matthew Blocks and Pavers

Class A concrete products, made to true dimensions
and delivered within Kampala and beyond.

ABOUT US

Bridging The Quality Gap

Matthew Blocks and Pavers Uganda Limited was established in 2024 with one clear goal: to bridge the quality gap between production companies and the end user.

We exist to make sure every client gets the right product for their project, looking closely at what is actually needed on site.

We deal in Class A concrete products: construction blocks, pavers, road kerbs and road caps, fencing poles, slabs, culverts and other related products.

Our mission is to build this nation on structures that stand the test of time, and to protect our clients' investments.

01

True dimensions

What your bill of quantities asks for is exactly what reaches your site.

02

Right strength

Lab-tested products that form the foundation of safe structures.

03

Class A quality

Every product that leaves our factory is a guarantee of durability.

DAILY
PRODUCTION
CAPACITY

7,000 blocks a day

300 m² of pavers a day

SECTION 02

Construction Blocks

Hollow and solid blocks in 4, 6 and 8 inch sizes.

Grade one, Class A blocks in hollow and solid types, made to true dimensions so that what is written in your bill of quantities is exactly what arrives on site.

6 types

Hollow and solid, three widths each

Class A

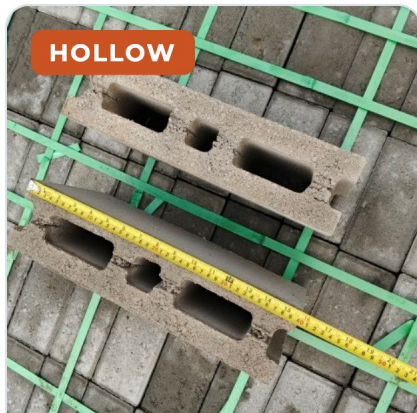

Grade one construction blocks

BLOCK GUIDE

Choosing The Right Block

Every block is 400 mm long and 200 mm high. Pick the width and type to match the load your wall must carry.

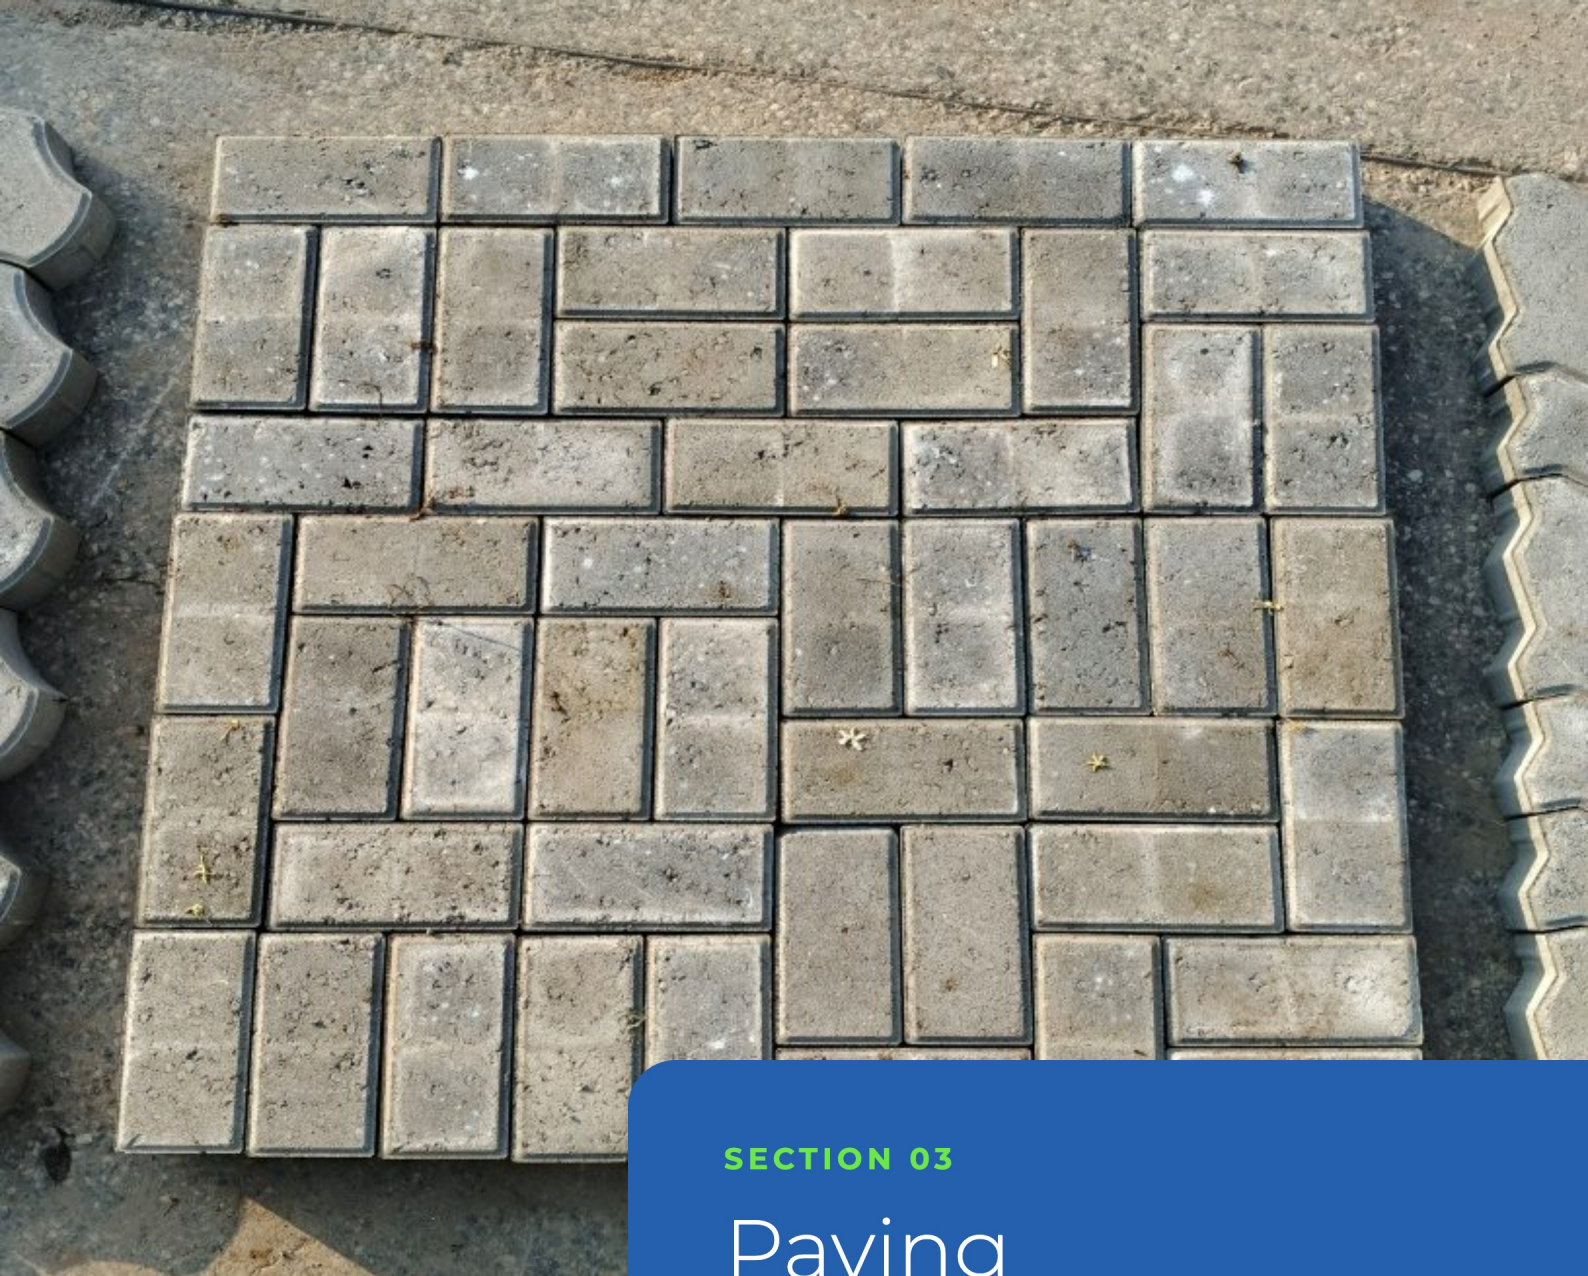

BLOCK	WEIGHT	WALL	CURING	BEST USED FOR
4-inch hollow	12.4 kg	30 mm	—	Interior partitions, toilet and bathroom walls, light room divisions
6-inch hollow	15 kg	30 mm	10 days	Interior partitions, boundary fences, light exterior infill walls
8-inch hollow	21.2 kg	30 mm	—	Load-bearing exterior walls, foundations, boundary fencing, utility routing
4-inch solid	15.4 kg	Solid	—	Non-load-bearing walls, internal partitions, garden edging
6-inch solid	25 kg	Solid	—	Moderate load-bearing walls, bungalows, boundary wall foundations, raised floors
8-inch solid	35.5 kg	Solid	14 days	Sub-grade foundations, retaining walls, main load-bearing and perimeter walls

Hollow Blocks

Lighter blocks with 30 mm walls. Best for partitions, infill walls, fences and, in the 8-inch size, load-bearing exterior walls.

Solid Blocks

Dense and heavy. Best for foundations, retaining walls and the main load-bearing walls of a building.

SECTION 03

Paving Blocks

Landscaping designs in light-duty and heavy-duty grades.

A wide range of landscaping designs with strong grading. All pavers are sold per square metre (1 m × 1 m).

60 mm • Light duty

Class 28 to 34 MPa. Walkways, residential compounds and patios.

80 mm • Heavy duty

Class 35 MPa and above. Parking lots, fuel stations, garages, warehouses and driveways.

SOLD PER SQUARE METRE
